

About Our Client

Our client is a Nigeria-based technology consulting firm delivering full-stack fintech and commerce platforms for clients across remittance, merchant payments, POS, and eCommerce. Our client's current engagements include KlemRemit (a cross-border money movement app and API), KlemPay (a merchant, agent and POS payment platform expanding into global multi-scheme card acquiring, with gateway partnerships spanning Cybersource and Mastercard Payment Gateway Services), and KlemStore (an eCommerce, storefront and payment gateway platform). We are growing our engineering team to deliver these products across a coordinated 12-month build.

Flutter Mobile Developer

Location: Lagos, Nigeria (Hybrid) — remote candidates within Nigeria considered

Engagement: Full-time / Contract — initial 12-month project engagement

Reports To: Head of Technology Development & Innovation

About the Role

You will build and maintain cross-platform mobile applications (iOS/Android) for our client's KlemRemit customer app, the KlemPay merchant/agent app, and the KlemPay POS terminal app.

Key Responsibilities

- Design, build and maintain Flutter applications for remittance customers, KlemPay merchants/agents and POS terminal operators
- Integrate mobile apps with backend APIs for wallet, payments, KYC/onboarding, transaction history and notifications
- Implement secure authentication (biometrics, PIN, OTP) and secure local storage for sensitive data
- Integrate card payment SDKs, QR code scanning and POS/card-reader hardware where applicable
- Implement push notifications, deep linking and offline-first data handling
- Optimize app performance, memory usage and battery efficiency across devices
- Write widget/unit tests and participate in code reviews
- Coordinate with backend and frontend teams to ensure consistent UX across web and mobile
- Manage App Store/Play Store release processes, versioning and crash monitoring (Firebase Crashlytics/Sentry)

Required Skills & Experience

- 3+ years experience building production Flutter apps (Dart) for iOS and Android
- Experience with state management (Provider, Riverpod, BLoC or similar)
- Experience integrating REST APIs, handling auth tokens and secure storage
- Experience with mobile fintech app patterns: KYC flows, OTP, biometric auth, transaction history
- Familiarity with native module integration (platform channels) for hardware such as POS/card readers or QR/barcode scanners
- Experience with push notifications (FCM/APNs) and analytics/crash reporting tools
- Experience publishing and maintaining apps on the App Store and Google Play
- Strong testing discipline (widget tests, integration tests)

Nice to Have

- Experience with POS hardware SDKs or card-present payment integrations
- Experience with biometric SDKs and secure enclave/keystore usage
- Experience in remittance or cross-border payment apps
- Familiarity with mobile CI/CD (Fastlane, Codemagic, Bitrise)

How to Apply

Send your CV, portfolio/GitHub links and a short note on relevant fintech/payments experience to careers@bcodestech.com, with the role title in the subject line.
